

180 GPH Tank Cleaning and Transfer Pump System

The TK-180 is a modular tank cleaning system, ideal for re-circulating and/or transferring fuels and oil in vessels, stand-by generators, trucks, buses, agricultural and heavy equipment with up to 200 gal tanks.

The self-priming 3 GPM brass gear pump is the heart of the kit. With an LG-X 500 Fuel Conditioner and water separator filter, the TK-180 makes a perfect "Do It Yourself" fuel reconditioning, filtration and tank cleaning system.

Fuel Quality Management - The Key to Engine Reliability & Performance

TK 180 ALGAE-X Pump Unit Assembly w/ LG-X 500 and TK 080	Model #
Cleans, Reconditions and Transfers Diesel Fuel, Oil & Coolant Pump Unit (TK-100), LG-X 500 Fuel Conditioner, TK-080 Fuel Filter, In-line strainer, Battery Connector Cables, Fuse, Switch, Flow 3 GPM, 12V or 24V, 1/2" Hose Barbs. Weight: 12 lbs (5.4 kg) Length: 12" (305mm) Width: 8.25" (210mm) Height: 10" (255mm) (Not for use with Gasoline)	TK 180
